

Higher education and the hopes of the world: The next three years of CGHE research, 3 December 2020

00:40:43 CGHE Webinars: You can read about our Transition Centre phase projects here: <https://www.researchcghe.org/research/2020-2023/>

00:43:38 Renee Smit: There be dragons here...

00:43:49 Johnny Rich: It's turtles all the way down.

00:52:47 claire callender: Please do think of questions you might like to ask Simon.

00:57:46 Victorița Trif: What will be representative in order to maximizing educational outcomes?

00:59:11 Johnny Rich: Is the growth of HE globally leading to more diverse approaches, increased homogeneity or perhaps speciation?

01:01:39 Tracy Zou: To what extent and how do the increasing diversity and multiculturalism benefit students in their learning?

01:12:29 David Law: After hearing the discussion and checking the website, I feel I have to ask whether the coverage of the Chinese HE system is sufficient?

01:13:06 claire callender: Any questions for Simon, Janja or Ka Ho?

01:14:02 Robin Shields: Question: How will CGHE represent the anti-racist and/or decolonial approach in its intellectual leadership and the work funded?

01:19:52 MICHAEL WOOLF: Are we being too optimistic about emergence of a new ideological divide (as mentioned by Janja). The new "cold war" may be between open and closed views of the world -- not between nations. Emergence of governments who view internationalism as foreign intrusion even invasion is apparent in many many parts of the world. Walls rather than bridges are dominant metaphors. Not a question but a comment I guess. Thank you for an excellent session

01:21:41 Andra le Roux-Kemp: I have another meeting now; thank you everyone for an interesting webinar!

01:22:03 Diana Laurillard: To what extent do you agree that: if we consider our responsibility to improve the inclusivity of HE, and on the other hand to contribute to the climate emergency, then we have to improve our reach to more overseas communities via digital methods, and to reduce student travel for transnational education by the same

means - recognising the peculiar value of f2f contact, and discovering how to emulate that online.

01:23:46 Janja Komljenovic: @Michael - very much agree. I meant to say that in the digital economy there is serious competition happening over the kind of arrangement that will dominate and how value will be captured; and at the moment the competition seems to be dominated between the USA and China (in terms of capitalization of markets with digital services and products at the core).

01:23:49 Paul Ashwin: Apologies I need to go to another meeting. Thanks for fascinating session.

01:24:36 CGHE Webinars: Thank you for joining today everyone. A recording of this webinar will be on the CGHE site tomorrow morning: <https://www.researchcghe.org/events/cghe-seminar/higher-education-and-the-hopes-of-the-world-the-next-three-years-of-cghe-research/>

01:25:18 CGHE Webinars: Our next webinar will be on Tuesday on 'Man-Woman Collaboration Patterns in Science: Lessons from a Study of 25,000 University Professors'. You can register here: <https://www.researchcghe.org/events/cghe-seminar/man-woman-collaboration-patterns-in-science-lessons-from-a-study-of-25000-university-professors/>

01:25:52 Cristina Carvalho: Many thanks, Simon, Claire, Janja and Ka for this fascinating webinar!

01:26:01 Elspeth Jones: Thanks for excellent presentations. Congratulations to CGHE for all that's been achieved in the first phase and good luck for the next.

01:26:17 CGHE Webinars: And to hear about our latest webinars and research, you can join our mailing list here: <https://researchcghe.us12.list-manage.com/subscribe?u=16ff8239ab5aa3c8d4f636725&id=1cadde4c55>

01:26:26 Renee Smit: Really enjoyed the conversations --- thanks!

01:27:34 Manasi Thapliyal Navani: Thank you for a very insightful conversation!

01:27:39 Mariia Tishenina: Thank you for a marvelous thought-provoking webinar!

01:29:07 Tracy Zou: Thank you so much for the eye-opening talk.

01:29:55 Laura Rumbley: Thank you for this and so many other insightful outputs from CGHE so far. I look forward to continue benefitting from your important work over the next three years!

01:30:52 McQueen Sum: Thank you for the insightful presentations!

01:32:23 Johnny Rich: Thank you for the presentations and for CGHE's always-enlightening work. Sadly I have to duck out now.

01:32:58 Armağan Erdoğan: Thank you very much for this excellent webinar. I believe collaboration in higher education is needed more than competition in our age of challenges. Therefore CGHE's collaborations will help constructing collaborative research globally.

01:33:14 Janja Komljenovic: @Diana - we should not forget about the costs of exponentially increasing size of data and internet traffic, which needs servers and cooling etc. Not to say that we should not consider less travel, but we should also look at the distance online work from all perspectives

01:35:22 Golo Henseke: re mini and short courses; Isn't the trend rather towards longer higher education; i.e. from graduate to post-graduate. Previous attempts to offer sub-bachelor programmes have not met with great success.

01:37:12 Vassiliki Papatsiba: Internet also contributes to global emissions. For in instance, watching online videos accounts for the biggest chunk of the world's internet traffic – 60% – and generates 300m tonnes of carbon dioxide a year, which is roughly 1% of global emissions.

01:39:42 Will Pollard: Thanks
