

# The Influence of High Skill Agglomeration on Skill Sorting: Evidence from China Tertiary Education Expansion, 31 May 2022

00:44:32 Marta Kozłowska: This is a fascinating piece of work - so detailed, too. Thank you for presenting.

00:45:02 PO YANG-China-PKU: Thanks!

00:45:29 Simon Marginson: Colleagues. Please now post your questions and statements for the Q&A, in the Chat

00:49:32 Zhuoli Qin: Thx! A very informative presentation on an interesting topic. I wonder how the formulas used for variables were developed in the research?

00:56:55 jisun jung: thank you for the interesting presentation. Can you explain the skill classification more detail (high/medium/low skills) in Chinese context and match with educational levels?

01:00:51 Yangxi Liu: I want to answer a question with my slides, is that fine?

01:03:31 Zhuoli Qin: Sorry i can not unmute myself

01:06:10 jisun jung: thank you for the response!

01:07:33 Dr. Bhaskar C.: Thanks CGHE. Indeed seems an effective quantitative study with important variables.

01:07:34 Zhuoli Qin: Yes you answered

01:07:40 Zhuoli Qin: Thx!

01:10:44 Simon Marginson: that's excellent Carly

01:10:59 Marta Kozłowska: These things happen - no need to worry too much, though it can be frustrating...

01:11:09 Jason Gregory: in terms of skills sorting? Did the research cover if the skills of the graduates are relevant to local economy?

01:13:09 Marta Kozłowska: If I may, is skill sorting linked somehow to candidate sorting by universities in China? A quick one, as I've got to teach at 3... Thank you in advance for such a great presentation today.

01:13:59 Marta Kozłowska: I meant: for your presentation and .... the answer in advance

01:14:19 Carly Brownbridge (Admin): Apologies for the technical problems today! Thank you for joining us today. A recording of this session will be posted on the CGHE site:
